

Kumho GT 4T 10W-50

New generation high-performance Motorcycle oil

Definition

It is an engine oil containing high performance additives produced for four-stroke motorcycles. It minimizes viscosity change at high temperatures thanks to its high-tech additives.

Protects the engine perfectly.

Places of Use

It can be used safely in four-stroke and high-performance motorcycles in all seasons. Also, API SN, JASO MA2 It is also suitable for European and Japanese manufactured motorcycles for which specifications are recommended.

Features and Benefits

- It protects the engine perfectly and extends engine life.
- Provides high engine power by reducing internal engine friction.
- Thanks to its high viscosity index, the oil film is preserved by keeping the viscosity of the oil under control even under severe conditions.
prevents tearing.
- Thanks to active cleaning agents, it keeps the engine clean by preventing active deposits and sludge formation.
- Provides excellent engine performance at high temperatures in air-cooled and water-cooled engines.

Specifications and Approvals:

API SN, JASO MA2

Test	Unit	Test method	Ideal values
Density, 15°C	g/liter	ASTM D 4052	0,88
Viscosity, 100°C	mm ² /s	ASTM D 445	18,5
Viscosity Index		ASTM D 2270	144
Pour Point	°C	ASTM D 97	-30
Flash Point COC	°C	ASTM D 92	234

Values shown may differ between productions.
